Field Day 2014

K2FA operated 1B Battery using 5 watts and solar power this year. It was a low-effort, high-fun adventure. Pete (KF2U) and Mike (KA2KQP) were the ops for several hours on Saturday. Conditions weren't great but 40 meters kept us interested.

We even broke a few SSB pile-ups which was completely amazing to all involved considering the 5 watts to a dipole :)

We managed 100 contacts in our leisurely attempt.

See you all next year...

29.6 Mhz. FM No Static at All

At least most of the time... Have made a few contacts on 10 FM from the mobile this summer. Always fun. I miss high sun spot numbers however. This cycle was quite a let down. Most of the time in the truck I listen on 29.6 or somewhere on 17 meters. Ten has opened sporadically which makes it a perfect band for SHRC.

Newsletter Ideas

If you have an idea for an article or you've written something you'd like to see in Shark's Teeth, send it in. We sporadically will publish a newsletter and wouldn't mind a sporadic contribution...
